

Robin Vale

React and Node.js, with a habit of adding the tests a codebase never had

Rivertown, Meridia (remote) · (+1) 555 010 2938 · robin.vale@example.com

Software engineer who likes taking a rough, half-automated process and turning it into something reliable and boring. Four years maintaining a production scheduling app used daily by internal staff, plus a couple of small self-directed tools built solo.

EXPERIENCE

- **Independent Projects — self-directed** 2022–present · ongoing
 - Small inventory-tracking web app for a local bakery, replacing a shared spreadsheet (React, Node.js, PostgreSQL), solo.
 - Open-source status-page generator (Python, Jinja2) — the same maintain-it-solo discipline the current role's testing work grew out of.
- **Software Engineer — Meridian Systems** Mar 2020–present · 4y · Rivertown (hybrid)
 - Maintains and extends a logistics-scheduling web app used by roughly 40 internal staff.
 - Introduced automated testing to a previously untested codebase, cutting regression bugs reported per release by half.

EDUCATION

- **BSc, Computer Science — Rivertown University** 2016–2019 · 3y

VOLUNTEER WORK

- **Community volunteering** 2021–present · Rivertown
 - Weekend shifts at a local food bank.

SKILLS

languages TypeScript, JavaScript, Node.js, SQL
frameworks/ React, PostgreSQL, Docker
tools
practices automated testing, CI/CD

Main technologies for this role — full list on request.
